Subject: Utility Cable Products Price Increase – Effective April 1, 2023

Dear Valued Customer,

The wire and cable industry continues to face significant and sustained increases in key material cost inputs used in the manufacturing and distribution of our products. Due to these sustained cost increases, effective April 1, 2023, Prysmian Group is announcing a price increase on all low voltage, medium voltage and bare overhead utility products.

For our alliance customers, the exact percentage of increase will be specific to cable design specifications and the implementation timing will be based on current contractual language. Updated price sheets along with the contractually required backup documentation will be provided prior to the new pricing going into effect.

This pricing action will allow us to continue to provide our valued customers with the high level of service and quality you have come to expect from the Prysmian Group. If you have any questions, please contact your Outside Sales Representative, Agent or Inside Sales Representative. We appreciate your business and look forward to continuing to serve your wire & cable needs.

Very truly yours,

PRYSMIAN GROUP
